

1st Training of Version 8 in Europe

Version 8 - Workshop in Ljubljana

May 4 - 5, 2009

To build a new version from scratch has been an extreme challenge for the developers and there of course had been multiple obstacles before dTIMS-CT's V8 could be released by Deighton Ass. Ltd.

After an extensive period of testing, we from Viagroup are encouraged by the new versions look and speed.

We are therefore proud to announce the 1st Training of Version 8 in Europe this coming May in Ljubljana, Slovenia.

Contact information

Registration

info@viagroup.ch

Costs per Participant

€ 1'000

Maximum 8 Participants

Alain Hueppi, Managing Director

Data Management and Analysis

Dr. Alfred Weninger-Vycudil
Technical Director

We'll first look at the most significant changes made from Version 7 to Version 8 in dTIMS-CT (Viapms).

We then will work with our training setup and do lots of practical exercises in the database but primarily with the analysis engine.

Our main goal is that you will mainly work with the new Version 8 after this workshop.

Many Thanks to Julijana Jamnik for organising this workshop!

Announcement:

2nd European User Conference

October 7 - 9 2009, Seehotel Rust (Austria)

Registration is now open: www.viagroup.ch
